- A. Product and adapter not properly connected.
- B. Incorrect input charging port, change to micro USB.
- C. AC adapter defective, use other method and try again.

Product does not charge other devices.

- A. The remaining charge of the product is too low, please recharge.
B. In case of further problems please contact your local dealer.

⚠ Safety Instructions

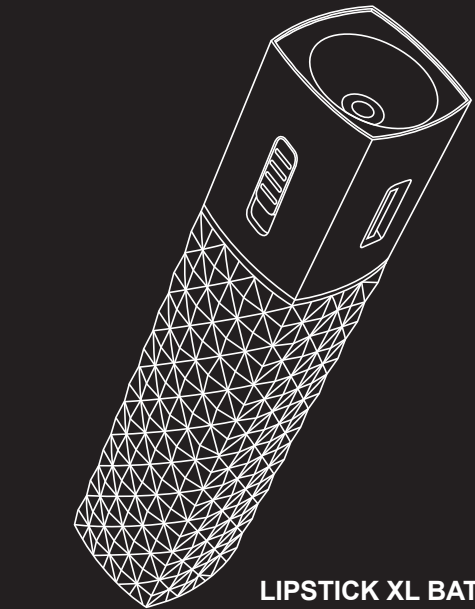

Read the user manual carefully before using the device. Misuse may lead to damages, e.g. smoke due to overheating. This is not covered by the warranty.

1. Ensure that your device is compatible with the product.
2. Do not expose the battery to fire, extreme heat or high temperatures.
3. Do not drop, strongly impact, disassemble or attempt to repair the battery yourself.
4. Don't disassemble the battery or attempt to repair or modify it in any manner.
5. Do not expose this battery to moisture; do not submerge water or other liquid. Keep the battery dry at all times.
6. Do not attempt to charge the battery using any method, apparatus or connection other than the USB connector. Read the user manual carefully if charging the device with other methods.
7. Do not replace original accessories without authorization.
8. The device should not be used by persons in need of care or children without supervision.
9. All products have been inspected thoroughly after production. Do not use the device in case of overheating, deformation, damages, scratches or other anomalies. Charge the device fully before first use to get the best results.
10. This device is suitable for most portable digital products. For details read the respective user manual carefully. The manufacturer will not take any responsibility for misuse.
